SIMMONS HARDWARE COMPANY, Inc.

MANUFACTURERS AND DISTRIBUTERS,

St. Louis, U. S. A.

COPYRIGHTED, 1903, BY
SIMMONS HARDWARE COMPANY, INC.
ST. LOUIS, U. S. A.

PRESS OF
LITTLE & BECKER, ST. LOUIS.

Art Goods

A careful study of the designs and patterns presented in this Catalogue with complete details of Lock Sets, Trim, Sizes, List Prices, etc., will enable an Architect or Builder to employ any of them in carrying out any scheme of harmony in any kind of a building, within any limit of expense.

Our Art Hardware is made in proper proportion, and is right mechanically.

We furnish the designs shown herein in any desired finish.

MAIL ORDERS

We want to handle your mail orders in just the way you want them handled.

The volume of our mail order business grows larger year by year.

We give you the same **LOW PRICES** on mail orders as are made by our salesman.

If you send in your mail order next week or next month, for the same goods ordered through our salesman, your order will be priced exactly the same as before, unless there has been an advance or decline in prices.

Our Aim: **FILLING ORDERS PROMPTLY**
FILLING ORDERS COMPLETELY
PRICING ORDERS UNIFORMLY

We carry heavier stocks and a more complete assortment than is shown by any other house.

This gives us the advantage of having the goods when you want them, and places at your disposal the best assortment of goods shown in America.

We will appreciate a continuance of and an increase in your mail order business.

Our large mail order business enables us to use up-to-date and improved methods that would not be possible in a smaller business.

Our shipping facilities enable us to ship promptly.

Whenever your mail orders are not handled to your entire satisfaction, or there is any other trouble with them, a letter addressed to the Sales Department will receive prompt and careful attention.

THE AGE OF IRON IS PAST—THE AGE OF STEEL IS BORN.

THE "VULCAN LOCK" EMBODIES NEW PRINCIPLES.

The Face, Bolts, Case, Hub and Internal Workings are all of Cold Rolled Steel. We show you a truly **Twentieth Century Lock.** Note the Interior Construction.

No Part of the Construction of these Locks is Composed of **Cast Iron**; the "**Vulcan**" and "**Vulcan Jr.**" Locks being the **Only Locks Made** in which **Cast Iron** is **Not Used.**

The Wonderful Triplex Spindle Secures Perfect Adjustment Without the Use of Knob Washers, being Adjustable at Both Ends, and the Knobs Never Work Loose.

ILLUSTRATIONS SHOWING RIGHT AND LEFT HAND DOORS AND LOCKS.

Cut shows Right Hand Lock for Right Hand Doors.

Hold the Lock Upright in Front of You in the Right Hand. If the Bevel of the Latch Bolt is Towards You, it is a Right Hand Lock. If the Flat Side of the Latch Bolt is Towards You, it is a Left Hand Lock.

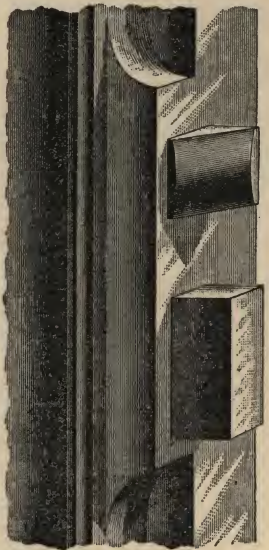

Cut of Double Doors, showing Right and Left Doors.

A Right Hand Sliding Door is one that slides to the Right to Open as you stand facing it from the outside, or on the side that the Key works.

A Left Hand Sliding Door is one that slides to the Left under similar circumstances.

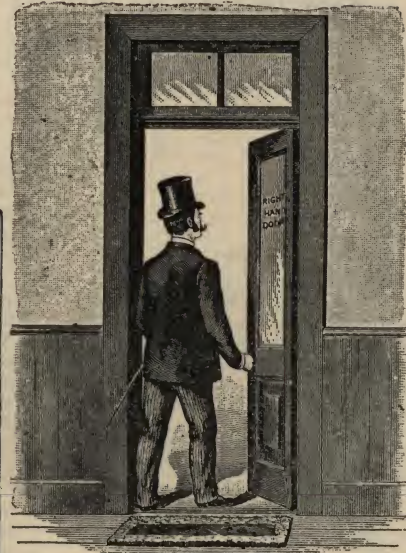

The Hand of a Reverse Bevel Latch is exactly opposite that of all others. In other words, a Right Hand Reverse Bevel Latch is one that Opens Towards You to the Right as you stand facing it. A Left Hand Reverse Bevel Latch is one that Opens Towards You to the Left as you stand facing it.

Cut shows Left Hand Lock for Left Hand Doors.

Hold the Lock Upright in Front of You in the Left Hand. If the Bevel of the Latch Bolt is Towards You, it is a Left Hand Lock. If the Flat Side of the Latch Bolt is Towards You, it is a Right Hand Lock.

We illustrate herewith the difference between Right and Left Hand Locks, and a careful study of this page will prevent any mistakes or confusion in ordering.

Cut shows Right Hand Door.

A Right Hand Door is one that Swings From You to the Right as you stand facing it.

Cut shows Left Hand Door.

A Left Hand Door is one that Swings From You to the Left as you stand facing it.

When you take an order for Master Keyed Locks, invariably give us the name of the user; not the contractor nor the retail merchant who furnished the goods, but the owner of the building. We must have this information. If you do not give it to us on the order, we are compelled to write the customer for same, which delays shipment several days.

A detailed illustration of a heavy-duty metal door lock mechanism. The lock is mounted on a dark, textured surface, possibly a door. It features a large, ornate handle with a circular dial or keyhole in the center. The handle is decorated with intricate scrollwork and a central emblem. To the left of the handle, there is a smaller, rectangular component, likely a deadbolt or a secondary locking mechanism. The overall design is robust and decorative, typical of late 19th-century hardware.

For Locks that cost \$6.00 per dozen and less,	\$
For Locks that cost more than \$6.00 per dozen.

SIMMONS HARDWARE COMPANY

WINDOW STOP SCREW WASHERS.

PER POUND.
No. 10— $\frac{3}{8}$ **in. Diameter, Brass Window Stop Screw**
Washers, Beveled Edge, Suitable for Nos.
8, 9 or 10 Screws, \$2.50

One-half Pound in a Box.

PER GROSS.
No. 3— $\frac{1}{2}$ **in. Diameter, Plain Bronze Polished,**
Complete with $\frac{1}{4}$ **in. No. 10 Flat Head Bronze**
Screws, \$5.00
No. 3/C— $\frac{1}{2}$ **in. Diameter, Steel, Plain Old Copper**
Finish, Complete with $\frac{1}{4}$ **in. No. 10 Flat**
Head, Old Copper Finish Screws, 2.50

One Gross in a Box.

To be used with round head screws for fastening the window stop or strip which holds the sash to the casing. When so used these washers prevent the head of the screw from sinking into the wood, and also prevent the stop from being marred, when it is necessary to remove same from the window, in order to take out the sash.

Cut oval holes in the stop for the screws, of such size that the washer will cover them, and when the woodwork has finished all shrinking, by loosening the screws the stop can be pushed up against the sash, to do away with rattling and admission of dust and draughts.

Ives Window Stop Screw Washers.

No. W/734—Plain Bronze Polished,	PER GROSS.
No. W/734/C—Plain Bronze Old Copper Finish,	3.15

One Gross in a Box, with Screws Finished to Match.

Used for fastening the window stop or strip, which holds the sash to the casing. In appearance it is neat and ornamental, affording a quick and simple adjustment of the shrinkage or expansion of window stops, doing away with weather strip and anti-rattler devices. Applied by boring a half inch hole in the window stop.

PLAIN BRONZE PULL DOWN HOOKS.

PER DOZEN
No. 305—1 in. Diameter, 2 $\frac{3}{4}$ in. Long, Plain Bronze
Polished, \$5.50

BOWER - BARFF

Rustless Finish Goods, on Iron and Steel, Plain Surfaces.

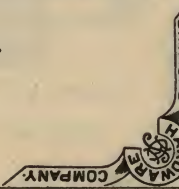

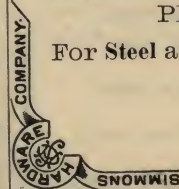

Pages 1547 to 1555, Plates 1004 to 1012 incl.

DESCRIPTION OF THE BOWER-BARFF PROCESS.

The Bower-Barff Rustless Treatment for Iron Work is so known from its inventors, Messrs. Bower & Barff. It is entirely distinct from any ordinary surface finish, such as is obtainable with Paint, Lacquer or Varnish. It is produced by submitting the metal to a chemical action and to heat, which changes the surface of the Iron into what is known as a Metallic-Oxide. This Oxide is of a dull Rustless black. The surface is very hard, and is firmly attached to the body of the metal. It is used to best advantage on Cast and Wrought Iron and Steel. It is not acted upon by Moisture or Acid Vapors and is especially appropriate for fine indoor Art Metal Work. It requires no attention, as it does not change its color, but it is not equally recommended for outdoor work, for, while the finish is rustless, it is found that perfect continuity of surface is not practically obtainable, and there are sometimes small microscopic openings in the surface, permitting the entrance of moisture and producing small rust spots when constantly exposed to the action of the weather.

It is packed with Ebonized Bronze Screws, which are rustless. With many kinds of hard wood it is the neatest and best trim that can be used.

- For Plain Bronze Goods, Plain Pattern, Polished and Old Copper Polished Finish, see Pages 1450 to 1490, Plates 927 to 964 incl.
- For Etrurian Design, Ornamental Bronze Goods, Steel Gray Finish, see Pages 1443 to 1449, Plates 918 to 926 incl.

EXPLANATION OF THE ADJUSTMENT OF A TRIPLEX SPINDLE KNOB.

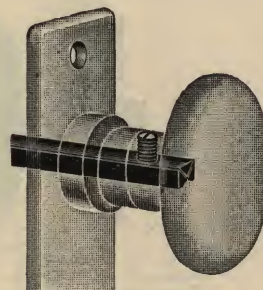

If sufficient adjustment is not obtainable at the Screw End of the Spindle, Remove the Pin which fastens the Knob to the Pin End of the Spindle and adjust the Knob to suit requirements.

V Shaped Piece.
To secure the Knob to the Triplex Spindle, Screw down the Set Screw hard against the V Shaped Piece as indicated above. Loosen but do not remove the Screw from Knob.

Shows Knob Screw, Corrugations and Cup Point

Triplex Spindles give Perfect Adjustment, and if the Screw is once properly tightened will Never Slip.

No. 312/C—For Doors $1\frac{1}{8}$ to $1\frac{1}{4}$ in. Thick, . . .	2.65
No. 313/C—For Doors $1\frac{3}{8}$ to $1\frac{1}{2}$ in. Thick, . . .	3.75
No. 314/C—For Doors $1\frac{3}{4}$ to 2 in. Thick, . . .	5.75

One Pair in a Box; Packed with Screws.

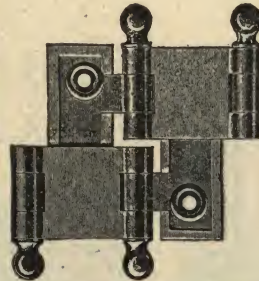

To economize for light doors, put a Chicago Spring Hinge at the top and a Blank Butt at the bottom of the door. Never use a blank on outside doors, as it takes the full power of two springs to hold the door against the draft. Always put it below the Spring Hinge.

One-half Pair Hinges and One-half Pair Blank Butts will hang an Inside Door.

CHICAGO DOUBLE ACTING BLANK BUTTS.

BLOUNT COMBINED DOOR CHECKS AND SPRINGS.

Reversible for Right or Left Hand Doors by removing the Arm, unscrewing the Cap, taking out the Spring and turning it over. Be sure that Arm is replaced in the same position as when removed. This is indicated by the Arrow on the Arm and Spindle.

Both Check and Spring are combined in one perfectly working mechanism.

Blount Combined Door Checks and Springs, Gilt Finish, Nickel Plated Caps.

	EACH.
No. O—Suitable for Screen Doors,	\$ 3.00
No. A—Suitable for Inside Doors not exceeding 3 ft. Wide by 1½ in. Thick,	4.00
No. B—Suitable for Vestibule and Light Outside Doors not exceeding 2 ft. 6 in. Wide by 2 in. Thick,	5.00
No. C—Suitable for Outside Doors not exceeding 3 ft. Wide by 2 in. Thick,	6.00
No. D—Suitable for Large Doors not exceeding 4 ft. Wide by 2½ in. Thick,	8.00
No. E—Suitable for Extra Heavy Outside Doors, Power four times greater than No. C,	10.00

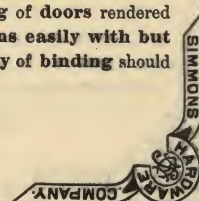

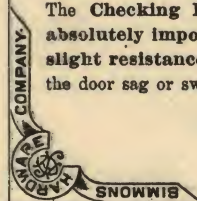

One in a Box; Complete with Wrenches, Screws and Printed Directions.

Extra Springs, for Repairing Blount Checks and Springs.

	EACH.
No. O/S—For Blount Checks and Springs No. O,	\$0.50
No. A/S—For Blount Checks and Springs No. A,	.60
No. B/S—For Blount Checks and Springs No. B,	.70
No. C/S—For Blount Checks and Springs No. C,	.95
No. D/S—For Blount Checks and Springs No. D,	1.40
No. E/S—For Blount Checks and Springs No. E,	1.70

The advantages of the Blount Combined Door Checks and Springs are: **Noiseless** in action and can be readily attached. Being free from packing friction, it allows the door to open and close with ease. Closing or Spring Power can be increased, diminished or removed entirely without disarranging any other part of the Check. The Checking Power is easily adjusted so as to close the door at any speed. Slamming of doors rendered absolutely impossible. The Tension of the Spring is least when the door is closed, so that it opens easily with but slight resistance. The Ball and Socket Joints which connect the Arms, prevent any possibility of binding should the door sag or swing out of line.

IMPROVED ECLIPSE DOOR SPRINGS.

Reversible for either
 Right or Left Hand Doors
 by withdrawing the Pin at
 the bottom of the Case, and
 turning the other side of
 Spring up.

Eclipse Springs and
 Checks should always be
 ordered in equal quantities
 to complete each other, as
 there is no other Spring
 made strong enough to
 operate successfully with
 the Eclipse Checks.

When applying Eclipse
 Springs, use Template
 packed with each Spring
 and follow Directions care-
 fully.

Eclipse Springs, Tuscan Bronzed, Surface Not Ground.

No. 1251—For Inside Doors, to match Eclipse Checks No. 1223,	EACH.
No. 1253—For Wide Inside Doors, or Narrow Outside Doors, to match Eclipse Checks Nos. 1223 and 1225,	\$1.80
No. 1255—For Wide Outside Doors, to match Eclipse Checks No. 1225,	2.30
No. 1257—For Very Wide Outside Doors, to match Eclipse Checks No. 1227,	3.00
	4.00

Extra Springs (Springs Only) for Repairs.

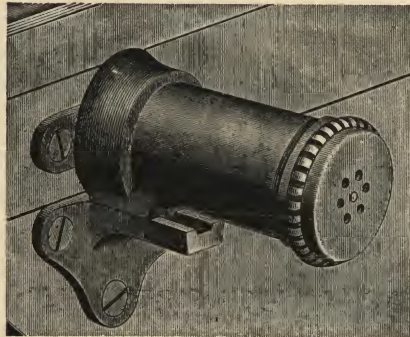

Flat Steel Repair Springs, for	{	Nos.,	1251/R	1253/R	1255/R	1257/R
either Right or Left Hand,		Each,	\$0.50	.75	1.00	1.35

The Power is greatest when the door is closed, and gradually decreases as the door opens. Parts are interchangeable, so that they can be easily replaced in case of breakage.

The Spring is adjustable tension, very compact and powerful, and is made from Extra Heavy Flat Clock Spring Steel of the Finest Quality.

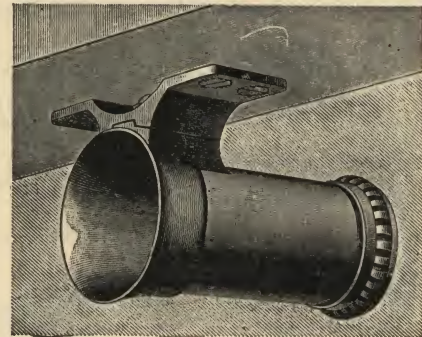

Eclipse Springs and Checks Packed Separately; One in a Box; Packed with Screws.

ECLIPSE DOOR CHECKS.

Cut shows Check Fastened to Door.

Reversible
 for either
 Right or
 Left
 Hand Doors.

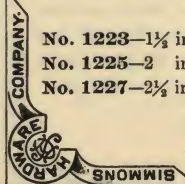

Cut shows Check Fastened to Casing.

Packed with Screws.

In ordering, invariable give number of Transom Lifter and Style of Finish.

To find proper length of Lifter wanted, measure from floor to center of Transom, then deduct five (5) feet for a top or center-hung Transom, or three and one-half (3 1/2) feet for a Transom hung at the bottom.

Bottom-hung Transoms always require a Lifter 18 inches longer than Top or Center-hung.

We recommend {
 A 1/4 inch rod for Transom not over 8 lbs. weight.
 A 5/16 inch rod for Transom not over 18 lbs. weight.
 A 3/8 inch rod for Transom not over 35 lbs. weight.
 A 1/2 inch rod for Transom not over 75 lbs. weight.
 Two 1/2 inch rods for Transom over 75 lbs. weight.

COMPANY

Trade Mark Registered.

A large, dark, textured metal hinge, likely made of cast iron or steel. It features a central cylindrical pin that passes through two large, triangular plates. Each plate has four circular holes: one near the outer tip and three arranged in a triangular pattern towards the center. The metal surface shows signs of wear and a rough, cast texture.

No. 150½—Half Sets, for Single Doors, Single Track, Complete with 2 Hangers, with 8 feet of Steel Track, 1 Floor Guide, **PER SET.**
\$3.00

One Set in a Box; Weight, Complete with Track, 15 lbs.

Screws required for full set No. 150, 1½ dozen 2 x 12 for Plates, ½ dozen ¾ x 10 for Guides, (not furnished with the Hangers).

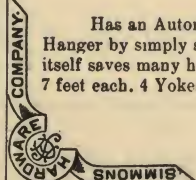

New Warner.

No. 25 —Full Sets, for Double Doors, Complete with 4 Hangers and 28 feet of Hardwood Track, **PER SET.**
\$6.00

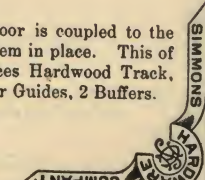

No. 25½—Half Sets, for Single Doors, Complete with 2 Hangers and 14 feet of Hardwood Track, **PER SET.**
3.00

Twelve Sets in a Case; Weight per Single Set with Track, 29 lbs.

Has an Automatic Gravity Lock. In hanging, after the Base Plate is screwed in place, the Door is coupled to the Hanger by simply sliding the parts together, when the Gravity Lock—of its own weight—falls and locks them in place. This of itself saves many hours of time over the setting of any other Hanger made. A full set consists of 4 pieces Hardwood Track, 7 feet each, 4 Yokes, 4 pairs Wheels, Steel Axles, 4 Plates, 4 Adjustable Screws, 2 Pockets, 2 Stops, 2 Floor Guides, 2 Buffers.

117	7 feet	6.50
118	8 feet	7.00
±119	9 feet	7.50
±120	10 feet	8.00

Special Sizes Made to Order.

Weight, per Set, about 35 lbs.

Each Set of Parlor Door Hangers, (for Single Doors), consists of 4 Fiber Trolleys, 2 Carriers, 4 Pendants, 2 Pendant Plates, 1 Guide with Screws.

Each Set of Parlor Door Hangers, (for Double Doors), consists of 8 Fiber Trolleys, 4 Carriers, 8 Pendants, 4 Pendant Plates, 2 Guides with Screws, 2 Stop Buttons with Lag Screws, 2 Stop Plates with Screws, 16 1 1/4 in. No. 12 Round Head Wood Screws.

The Hangers with the necessary Guides, Stops, Screws, etc., for each Set, are Packed Complete in a Wood Box, together with Full Directions for Putting up.

The Adjustment is in the Track, and not in the Hanger. As the Door is raised and lowered with the track, it cannot bind against the track, and, as the track can be raised or lowered, the Door need not bind on the floor.

Track can be taken out of the pocket and replaced without defacing walls after house is finished.

Track Hangers are of Steel. The Trolleys are of Vulcanized Fiber. **Bearings are Self-lubricating and never require oiling after they leave the factory.** The movable parts are so arranged that no two metal surfaces come together, thus reducing the noise to a minimum. No possibility for chips or plastering to fall into the track and thus cause doors to jolt or jump.

Requires less space between the studding than any other device, 3 to 4 inches, according to thickness of door.

Hangers are provided with a lateral motion which prevents the trolleys from binding when the Doors become warped.

The track being attached to header at three points only, it is not affected by the warping and twisting of the woodwork. The peculiar construction of the hanger prevents the tilting of the Door and displacement of the trolleys, so common to other fixtures.

The track of each set is bolted on to a header at the factory, with all the parts in their proper places, to fit the openings for which they are intended, thus leaving but little for the carpenter to do.

±Goods marked thus (±) are not carried in stock and can only be furnished by shipment direct from factory.

SIMMONS

BARN DOOR HANGERS.

Cut shows Pattern of the
"Run Easy" Rail.

TRADE MARK:
"RUN EASY,"
REGISTERED.

Run Easy,* Steel, Anti-Friction, Covered, with Self-Locking Loose Axles.

	PER DOZEN PAIRS.
No. 1 —3 in. Wheel, 5 foot Run, Weight per dozen pairs, 102 lbs.,	\$15.00
No. 1½—4 in. Wheel, 10 foot Run, Weight per dozen pairs, 132 lbs.,	18.00
No. 2 —5 in. Wheel, 11 foot Run, Weight per dozen pairs, 174 lbs.,	22.00

Packed either One Dozen or One-half Dozen Pairs in a Crate.

The Run Easy Hangers are made with heavy steel strap; wheels are heavy, strong and deeply grooved, with loose steel axles. Both ends of the run-way in the rider bar are contracted; by this device the axle of the wheel becomes locked when it reaches the end of the run-way, and the wheel then turns on the locked axle until it begins its return run. This prevents the axle from being worn away, or from cutting into the rider bars, an objection frequently urged against other Anti-Friction Hangers. Our illustration also shows how to hang a barn door to prevent its jumping the track; namely, by fastening a small block to the top of the door at the center of each hanger, to reach up to within $\frac{1}{4}$ inch of the rail; this will prevent the door from lifting far enough to allow the flanges of the wheel to jump.

TRADE MARK:
"RUN EASY,"
REGISTERED.

S. H. Co. Run Easy* Warehouse Hangers, Heavy Steel, Anti-Friction,
with Self-Locking Loose Axles.

	PER DOZEN PAIRS.
No. 600—Warehouse, 6 in. Wheel, 14 foot Run, $1\frac{3}{4}$ x $\frac{5}{16}$ in. Strap, Weight per dozen pairs, 400 lbs.,	\$54.00
No. 700—Warehouse, 7 in. Wheel, 16 foot Run, 2 x $\frac{5}{16}$ in. Strap, Weight per dozen pairs, 530 lbs.,	72.00

One-quarter Dozen Pairs in a Case.

Our No. 700 is the strongest and heaviest Warehouse or Barn Door Hanger made.

No. W—Warehouse Rail, Flat Steel, 2 x $\frac{5}{16}$ in., (without Brackets or Lag Screws), in 6, 8 and 10 foot Lengths, \$0.18 PER FOOT.

Packed Regularly 10 Pieces in a Bundle; Weight per 100 Feet, 215 lbs.

A 2 x 4 in. Header should be used and the Rail should be secured to it by $\frac{1}{2}$ in. Lag Screws.

SIMMONS

SIMMONS HARDWARE COMPANY.

“ACER’S” BOLT AND SCREW CABINETS.

Cut shows front of Bolt Cabinet.

TO OPERATE CABINET.

The Bolt and Screw Cabinets are operated as follows:

Suppose you want a bolt, say, $1\frac{1}{2} \times 4$; cabinet is in position as shown by cut. Take hold of knob in vertical row opposite $1\frac{1}{2}$ with left hand and of knob in horizontal row below figure 4 with right hand, then slide door in verticle row up one space and door in horizontal row to the left, one space—all done in an instant

Impossible to get sizes mixed A perfect success in actual use, and a handsome piece of store fixtures.

Each
 ‡No. 7—Screw Cabinet. 98 Compartments. Made of Oak, nicely finished. Size: 18 x 30 inches, on Counter; 36 inches High....\$ 50 00
 ‡No. 19—Bolt Cabinet, 180 Compartments. Made of Oak, nicely finished. Size: 33 x 58 inches, on Floor; 6 foot 4 inches High 100 00
 Weight, Crated: No. 7, about 170 lbs.; No. 19, about 500 lbs.

‡No. 7 Screw Cabinet.

Holds Screws as follows:

$\frac{3}{8}$ inch x No. 3, 4, 5, 6, 7, 8, 9.
 $\frac{1}{2}$ inch x No. 3, 4, 5, 6, 7, 8, 9.
 $\frac{5}{16}$ inch x No. 6, 7, 8, 9, 10, 11, 12.
 $\frac{3}{4}$ inch x No. 6, 7, 8, 9, 10, 11, 12
 $\frac{7}{16}$ inch x No. 6, 7, 8, 9, 10, 11, 12.
 1 inch x No. 7, 8, 9, 10, 11, 12, 13.
 $1\frac{1}{4}$ inch x No. 7, 8, 9, 10, 11, 12, 13.
 $1\frac{1}{2}$ inch x No. 8, 9, 10, 11, 12, 13, 14, 15.
 $1\frac{3}{4}$ inch x No. 8, 9, 10, 11, 12, 13, 14, 15.
 2 inch x No. 10, 11, 12, 13, 14, 15, 16.
 $2\frac{1}{4}$ inch x No. 10, 11, 12, 13, 14, 15, 16.
 $2\frac{1}{2}$ inch x No. 12, 13, 14, 15, 16, 17, 18.
 $2\frac{3}{4}$ inch x No. 12, 13, 14, 15, 16, 17, 18.
 3 inch x No. 12, 13, 14, 15, 16, 17, 18.

‡No. 19 Cabinet.

Holds Bolts as follows:

 DIRECT FROM
 FACTORY.

†RIVERSIDE HARDWARE CABINETS.

Made of antique oak, finished in the natural wood, oiled and varnished. The bottom and sides of drawers are of Old Process Roofing Tin with hardwood fronts. The mountings and trimmings are of brass and bronze metal. Each drawer has a label holder, where cards bearing names of contents are placed.

Printed cards, labelled to suit, furnished with each Cabinet.

- | | |
|---|---------|
| | Each |
| †No. 1—Hardware Cabinet, has 433 drawers; height of cabinet, 63 inches; length, 64 inches; depth at top, 12 inches; depth at base, 20 inches..... | \$90.00 |
| †No. 2—Hardware Cabinet, has 378 drawers, same general measurement as No. 1. The four rows of drawers used for screws in No. 1 are changed to two rows for butts in No. 2..... | 90.00 |
| †No. 3—Hardware Cabinet, has 127 drawers, same general measurement as No. 1. The base is used for broad-axes, hatchets, squares, hammers, etc., and the top for locks, knobs, butts, brackets, etc..... | 90.00 |

Nos. 1 and 3 or 2 and 3 make a good combination, covering nearly all lines of hardware usually carried.

Shipping Weight: No. 1, about 550 lbs.; No. 2, about 550 lbs.; No. 3, about 500 lbs.

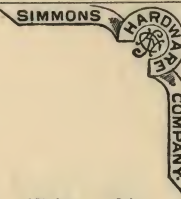

†Goods marked thus (†) are not carried in stock and can only be furnished by shipment direct from factory.

Head and Small Shank.....	Per pound.....	\$3.20	2.49

Put up in 25 lb. Boxes.

These Tacks have small heads and small shanks, and count very many more to the pound than the regular Upholsterers' Swedes Tack, which is frequently sold for the same purpose. The parties using these Tacks buy them by the pound, and use them by the piece, and it is consequently to their advantage to have as small a Tack as is practicable for the purpose.
